

Designed by world-class heli pilot Scott Gray, the latest addition to the Vibe family of helicopters offers the ultimate in aggressive flight performance and is designed to withstand the stresses of the most extreme aerobatic and 3D maneuvers, even those that have yet to be imagined. Features like the oversized tail and main shafts, the oversized Sprag autorotation clutch and 10mm spindle shaft that can handle the most aggressive maneuvers, a robust split gear constant-driven tail rotor, and a light-weight, rigid structural design make the Vibe 90™ SG an unbeatable choice for heli pilots who want to push 3D performance beyond the edge.

If you've been waiting for a helicopter design that has unlimited flight performance with the reliability and the durability to handle the most demanding aerobatics... your wait is over. Once you take the controls of the Vibe 90 SG, you'll know your wait was worth it.

FXHeli.com has worked closely with the distributors and manufacturer to get the best possible deals available on this ultimate helicopter. Stocks are limited so, get in today! *(Payment plans available)*
